Publication Date:

Thursday, 26 de February de 2004

The previous Financial Stability Report showed that solvency had improved not only for credit establishments but also for firms and households, which are the system's main counterparts within the real sector. Specifically, the Report described how the financial system's solvency had recovered and its main clients' financial situations had returned to normal. In this context, institutional conditions were ripe for intensifying credit relations between the financial system and the real sector.
