
Forty Economics Students to Participate in the 2021 Central Banking Course

-

After a rigorous admission exam and selection process, *Banco de la República* and the Economics Researchers Network announced the list of 40 economics students from various universities throughout the country, who were chosen to participate in the Central Banking Course to be held on July 14-23, 2021.

The course will introduce them to economic concepts and models that allow for an understanding of how monetary policy works, some of its theoretical foundations, and its interaction with the general macroeconomic environment. It also will delve into aspects of the workings and decisions of a central bank.

By the end of the course, the students will be able to understand and interpret the monetary policy decisions of central banks, their macroeconomic implications, and to analyze them with the help of formal tools.

In the next few days, the organizers will contact the selected students via e-mail to provide them with all the information they need take part in this advanced academic program.
