Saving-Investment Flows for the Fourth Quarter of 2024

1. By Institutional Sector

According to the Financial Accounts calculated by *Banco de la República* (the Central Bank of Colombia), in the fourth quarter of 2024, the current account deficit of the Colombian economy reached 1.7% of quarterly GDP, compared to 1.6% in the same period of 2023. This was mainly reflected in the deficit of the General Government (16.4%).

Source: *Banco de la República* - Financial Accounts

Compared to Q4 2023, domestic and external financing needs increased by 0.1 pp. This was mainly explained by a reduction in financing capacities of non-financial corporations (2.3 pp) and increased financing needs of financial corporations (0.4 pp). These changes were offset by lower net financing needs of the General Government (1.5 pp) and higher financing capacities of households (1.1 pp).

2. By Financial Instrument / Net External Financing

The negative quarterly saving-investment balance of the Colombian economy was covered by net external financing flows equivalent to 1.7% of quarterly GDP. Net inflows of financial resources from the rest of the world were mainly channeled through foreign direct investment and other equity investments (F5) at 2.7%, net issuance of debt securities (F3) to the rest of the world at 2.5%, and the net inflow of loans (F4) from the rest of the world equivalent to 0.7%. This was offset by the net accumulation of currency and deposits abroad (F2) at 4.3% of quarterly GDP.

Financial Account Balances for the Fourth Quarter of 2024

1. Net Financial Position by Institutional Sector

At the end of the fourth quarter of 2024, the Colombian economy recorded a net debtor position with the rest of the world equivalent to -52.8% of annual GDP. This was composed of the net debtor position of non-financial corporations (-85.6%) and the General Government (-40.9%). This was partially offset by the net creditor positions of households (63.5%) and financial corporations (10.1%).

Compared to the fourth quarter of 2023, there was a 6.2 pp reduction in the external debtor position of the economy, explained by the reduction in the net debtor position of non-financial corporations (10.8 pp). These changes were partially offset by an increase in the net debtor position of the General Government (5.0 pp) and a decrease in the net creditor position of households by 0.3 pp.

2. Net External Position by Financial Instrument

At the end of the fourth quarter of 2024, the net debtor position of the Colombian economy with the rest of the world, equivalent to -52.8%, was mainly represented by equity and investment fund shares (F5) at -40.1% and loans (F4) at -22.6% of annual GDP. This was partially offset by Colombians' foreign holdings of currency and deposits (F2) and debt securities (F3) at 6.1% and 2.5%, respectively.

Compared to the fourth quarter of 2023, the reduction in the net debtor position of the economy by 6.2 pp was mainly due to the decrease in the net debtor position through equity and investment fund shares (F5) by 6.0 pp, along with the higher foreign holdings of deposits (F2) and debt securities (F3) by 1.2 and 1.1 pp, respectively. This variation was partially offset by a higher level of debt through loans (F4) by 1.8 pp.
