
[Seminario de Macroeconomía – Bank Specialization In Lending To New Firms](#)

[Seminarios](#)

Seminario Macroeconomía: Seminario de análisis, discusión y divulgación académica de temas de macroeconomía y banca central. Cubre los siguientes subtemas: actividad económica y mercado laboral, precios, inflación, mercado cambiario y derivados, sector monetario y financiero, estabilidad financiera, sector externo y economía internacional, crecimiento económico, sector público y banca central (billetes y monedas, sistemas de pagos y operación bancaria, corporativo e institucional). El seminario es dirigido principalmente a los investigadores, academia, autoridades económicas y público especializado.

Resumen: We formulate a novel dimension of bank-lending specialization---specialization in lending to new firms---and investigate its impact on the creation, credit access, and survival of new businesses. We exploit a Portuguese reform that drastically reduced the red tape of starting a new firm and that was rolled out in a staggered manner across municipalities from mid-2005 onward. We show that while reducing regulatory barriers stimulates business creation, this effect depends crucially on the pre-reform number and market share of local banks specialized in lending to new firms. A greater presence of such specialized bank branches is associated with improved credit access and higher leverage of new local businesses. Moreover, new firms that obtain loans from specialized branches exhibit an up to 12 percent higher survival rate.

Autores: Alexandra Matyunina, Ralph De Haas, Steven Ongena and Diana Bonfim
